Project-002: Google Landing Page (HC-02)

Description

Project aims to create google landing page.

Problem Statement

• Your company has recently started on a project that aims to create a landing page. So you and your colleagues have started to work on the project.

Project Skeleton

Expected Outcome

Objective

README.md 4/27/2022

Build a Landing that is functionally similar to this: Google Landing Page

At the end of the project, following topics are to be covered;

- HTML
- List Properties-Tables / CSS-The Display Property-The position Property
- Overflow Property-The float Property-Opacity / Transparency-Units in CSS
- CSS Setting height and width-CSS Outline-CSS Combinators

At the end of the project, students will be able to;

- improve coding skills within HTML & CSS
- use git commands (push, pull, commit, add etc.) and Github as Version Control System.

Steps to Solution

- Step 1: Download or clone project repo on Github
- Step 2: Create project folder for local public repo on your pc
- Step 3: Create Google Landing Page

Notes

• You can use HTML, and CSS to complete this project.
